Tandem axles must have their centers separated by at least 3' 5" but not more than 8' 0". (Non-Divisible Loads Only)

For Method of Movement Loaded On and/or Towed By

- ☐ 120,000 lbs. on 6 or more axles and/or 100,000 lbs. on 5 axles
No tractor tandem may exceed 48,000 lbs. and no axle in the tandem may exceed 25,000 lbs.
Maximum tandem weight on a trailer or towed vehicle having only one two axle tandem is 48,000 lbs. and no axle in the tandem may exceed 25,000 lbs.
Maximum tandem weight on a trailer or towed vehicle having only one three or more axle tandem is 60,000 lbs. and no axle in the tandem may exceed 21,000 lbs.
Max tandem weight on a trailer or towed vehicle having one tandem and one single axle as the last axle on the rig is 40,000 lbs. and no axle in the tandem may exceed 21,000 lbs. The single axle may not exceed 20,000 lbs.
The sum of all trailer or towed vehicle axles must not exceed 60,000 lbs.
Max axle weight on a trailer or towed vehicle having only two single axles is 24,000 lbs.
Max axle weight on the steer axle is 20,000 lbs.
The spacing between the STEER AXLE and the first axle on the tractor tandem may not be less than 8' 1".
The spacing between the last axle on the tractor and the first axle on the trailer must be at least 19' 0".
The sum of all axle spacings must be at least 44' 0".

For Method of Movement Own Power

- ☐ 76,000 lbs. on 4 or more axles, 44,000 lbs. max on a two axle tandem and 44,000 lbs. max on a two or more axle tandem. No axle may exceed 23,000 lbs. Minimum overall axle spacing of 23 feet required.
- ☐ 68,000 lbs. on 3 or more axles, 21,000 lbs. max on the front axle and 48,000 lbs. max on a two or more axle tandem. No tandem axle may exceed 25,000 lbs. Minimum overall axle spacing of 18 feet required.

One escort vehicle is required for all moves during hours of darkness. Vehicles or loads of legal width, 8'-6" or less, are exempt from this requirement.

Movement is valid on the system of state highways under the jurisdiction of the Department of Transportation. The permittee is required to move only on the state routes approved for loads that do not exceed practical maximum weights (see Section 554.604). Before each move, the permittee must research construction zones, posted structures, approved overweight routes, etc... from the following resources: <http://www.dot.il.gov/tpublic.html#truckers>, www.gettingaroundillinois.com, and the "Illinois Overweight and Overheight Permit Routes" map. Information contained on the aforementioned lists and maps on the websites take precedence over the hard copy maps. All movements must be made strictly in compliance with the provisions set forth on the reverse side of this document and OPER 993 Special Vehicle Movement Permit Provisions applying as if fully written herein. The permit must be carried in the vehicle and must be available for inspection by police or department officials. The permit may not be transferred, extended or altered. The vehicle may not exceed the posted limit on any bridge.

Note: Refer to "General Provisions" on reverse of this form.

How do you want the permit returned to you? ☐ Mail (to the address above) ☐ Pickup (I will pick it up at the Permit Office)

This form, along with all other Illinois OS/OW permit application forms, is available on the Internet at: <http://www.dot.il.gov/road/trckpmts.html>. Choose the Word or PDF file. Adobe Acrobat is required for the PDF files. For more information call 217-782-6271.

GENERAL PROVISIONS

LOCATIONS WHERE PERMIT IS NOT VALID: The permit is not valid on any highway or bridge posted for a load limit less than the gross weight of the move, on any highway closed to traffic, and on any highway not maintained by the Department of Transportation. The right to use highways other than those specified is neither implied nor granted. The permittee must obtain permission from the proper local authority to use local streets or highways or from the Illinois State Toll Highway Authority if over the Tollway.

RESTRICTIONS ON MOVEMENTS: All movements made under authority of permits not specifying routes shall exercise due caution to prevent unauthorized use of any structure, highway, temporary route detour, runaround or turnaround. Posted maximum width, height, speed, gross weight or other restrictions shall be observed.

RIGHT-OF-WAY DURING MOVEMENT: Insofar as practicable, movements shall be confined to a single traffic lane and shall be made in such a manner that the rest of the roadway will be open at all times so the flow of other traffic will not unnecessarily be obstructed. Also, insofar as practicable, other traffic will be given the right-of-way over this movement. The driver shall remove the vehicle from the roadway when necessary to allow an accumulation of traffic to pass or when so directed by a police officer.

SPEED: Maximum speed shall be 45 m.p.h. on all permit movements or 5 m.p.h. above the minimum posted speed limit, **Except** when otherwise specified in the permit. Legal weight, legal height movements up to and including 10 feet wide are allowed to travel at the legal maximum speed limit.

LEGAL HEIGHT MOVEMENTS: Permit authority is not required for the movement of vehicle(s), inclusive of load, not exceeding the legal height limitation of 13 feet 6 inches as established in Chapter 15, The Illinois Vehicle Code. Therefore, no action is taken by the Department, either separately or in conjunction with authorizing an otherwise oversize or overweight movement, to ensure adequate clearance of structures for a vehicle(s), inclusive of load, not exceeding 13 feet 6 inches overall height.

PUBLIC AND PRIVATE LIABILITY: The grantee assumes all responsibility for injury to persons or damage to public or private property, including his own, caused directly or indirectly by the transportation of vehicles or vehicles and objects authorized under this permit. The grantee agrees to hold the State of Illinois harmless from all suits, claims, damages or proceedings of any kind and to indemnify the State of Illinois for any claim it may be required to pay arising from the movement.

LIABILITY INSURANCE: Owners and/or operators of escort vehicles or vehicles with oversize loads exceeding 10 feet in width, 13 feet 6 inches in height, 110 feet in length or overweight must have in effect or be self-insured in the minimum amount of \$500,000 per occurrence combined bodily injury or property damage.

RED FLAGS: The extremities of all oversize vehicles, vehicle combinations or loads, and all protruding objects shall be marked with clean red flags not less than 18 inches square.

GENERAL PROVISIONS OVERDIMENSION

ESCORT VEHICLES: One escort vehicle will be required on all loads more than 14 feet 6 inches wide. A pole for measuring vertical clearance shall be mounted on the lead escort vehicle for moves in excess of 14 feet 6 inches in height. An escort vehicle may be a passenger car, or a second division vehicle not exceeding a gross vehicle weight of 8000 pounds that is designed to afford clear and unobstructed vision both front and rear. Escort vehicles shall display red flags at the extremities, display "OVER SIZE LOAD" signs, be equipped with an operating rotating or flashing amber light mounted on top, and be operated by properly licensed operators at least 18 years of age. The driver of the escort vehicle must be in radio contact with the driver of the permit vehicle.

OVERLENGTH OBJECTS: Movements of objects over 80 feet in length shall be equipped with two operating, flashing amber lights – one over the cab of the vehicle; the other within 10 feet of the rear of the object, mounted as high as practicable over it.

Disclaimer:

In issuing the permit for oversize movement, the Department has determined that posted clearances are greater at those points than the height or width of the vehicle and load stated to the Department. However, due to variations in length of vehicles, inclines, curve radii, and other road conditions and factors, the Permittee cannot assume the posted height or width is adequate for the movement. It is also the responsibility of the permittee, when not in conformance with Section 5/11-1203(a) of the Vehicle Code, to inspect all railroad grade crossings for clearance along the permitted route prior to a move. The permittee waives liability of the Department should posted height or width or railroad grade crossing clearance prove inadequate, assumes sole responsibility, and indemnifies the Department for damages.
